PREFACE

South Australian Economic Indicators is a monthly publication which contains the latest available data at the time of preparation for a range of statistical series that have been identified as indicators of economic activity in this State. In a number of cases the figures presented are preliminary and subject to revision in subsequent issues.

Written and graphic commentary have been included for many of the selected series and analysis has been augmented with the calculation of the percentage change from the previous reference period together with the presentation of comparative Australian data. Time series information has been included to provide a historical perspective on many of the selected indicators. Future issues may be expanded to include further historical data in response to expressed user needs. This product is under continuous review and any suggestions for enhancement will be welcomed.

More detailed information on each series (including explanatory and technical notes) can be obtained from other Australian Bureau of Statistics publications or alternative data sources. To assist those seeking further information a source publication for each of the series has been documented in the statistical summary.

This issue includes a special article entitled *Working Arrangements of South Australian Employees*. Future issues will contain further articles on statistical topics which concentrate on longer term trends or other issues pertinent to the South Australian economy.

If you have any inquiries concerning this publication please contact the editor, Brian Moody, telephone (08) 237 7315. All requests for statistical information should be directed to the ABS Information Service, GPO Box 2272 Adelaide SA 5001, telephone (08) 237 7100.

REVIEW

Overview

- The underlying trend estimate for employed persons in South Australia has been increasing over the past 6 months with the September 1994 estimate 2.2% above the level of 12 months ago, while the trend unemployment rate has been falling since January.
- In August 1994 the trend estimate series for dwelling units approved in South Australia turned slightly downward, following a gradual flattening over previous months.
- Overseas exports of South Australian produced commodities during the month of August were 7.4% above the July level while overseas imports into South Australia were 9.8% above the July level.
- The trend estimate for retail trade in South Australia has been moving upward for the past 4 months after being in decline in the early part of 1994.
- The provisional trend estimate for new motor vehicle registrations in August 1994 fell 0.5% from the July figure, flattening out the upward movement evident for the previous 9 months.
- The South Australian total for secured housing finance commitments for owner occupied dwellings in August 1994 was 5.9% above the July figure.
- The number of short-term visitor arrivals to South Australia for July 1994 was 71.5% above the June figure and 14.9% greater than in July 1993.
- Over the year to June, the rate of growth of Gross State Product (GSP) in South Australia was 5.1%, slightly below the national average of 5.5%.

State Accounts

Gross State Product

The June quarter growth in Gross State Product (GSP) (trend estimates expressed in current prices) was 1.3%, slightly below Gross Domestic Product for Australia which rose by 1.5% for the corresponding period.

Over the year to June, the rate of growth was 5.1%, slightly below the national average of 5.5%.

Increases in wages, salaries and supplements (1.6%) and indirect taxes less subsidies (1.5%) have contributed to the growth in GSP for the June quarter 1994.

The gross operating surplus component of GSP increased by 1.0%, a lower rate of growth than in the preceding two quarters. The public trading enterprise sector contributed to the slowing growth rates for gross operating surplus. Partially offsetting this were the mining and manufacturing indicators which showed an increased rate of growth in the June quarter.

State Final Demand

State Final Demand (trend estimates in 1989-90 prices) increased 0.6% during the June quarter, approximately half the Australian average of 1.4%. The poor performance of private investment contained the overall growth rate of GSP.

Private capital expenditure declined 2.4% in the June quarter reaching the lowest level since September quarter 1984. All components of private capital expenditure declined in the June quarter except real estate expenses which remained constant.

Private final consumption expenditure and public capital expenditure increased by modest rates of 0.4% and 0.7% respectively, in the June quarter. The growth rate of government final consumption rose strongly by 3.1%.

International Accounts

Exports

Overseas exports of South Australian produced commodities during the month of August were valued at \$292.2 million, 7.4% above the level for July. Metals and metal manufactures constituted 14.2%; road vehicles, parts and accessories 10.1%; petroleum and petroleum products 8.9%; and cereals and cereal preparations 6.9% of the total value.

Exports to Japan accounted for 18.3% of the total during August, followed by the ASEAN countries (13.7%), New Zealand (10.1%) and the United States (8.5%).

Imports

Overseas imports into South Australia during August (compiled from import documents lodged in South Australia) were valued at \$279.1 million, 9.8% above the level for the previous month. Road vehicles, parts and accessories constituted 25.2%; machinery 19.9%; petroleum and petroleum products, 15.5%; and metals and metal manufactures 6.2% of total imports.

**TOTAL MERCHANDISE IMPORTS AND EXPORTS
SOUTH AUSTRALIA**

Consumption and Investment

Retail Turnover

Retail trade trend estimates indicate that retail sales for South Australia in August 1994 have shown a rise of 0.8% from July which is similar to the Australian increase. The South Australian trend estimate has shown moderate growth over the last two months after being in decline during the early part of 1994. The retail turnover estimate in original terms for South Australia was \$646.6 million for August, an increase of 0.7% from the July level of \$642.1 million. Industries showing growth in the trend estimates were other food stores; hotels, liquor stores and licensed clubs; clothing and fabric stores; furniture stores; and floor covering stores.

**RETAIL TURNOVER
PERCENTAGE CHANGE FROM PREVIOUS MONTH
TREND ESTIMATES**

New Motor Vehicle Registrations

The provisional trend estimate for new motor vehicle registrations for September 1994 rose 0.1% from the August figure, flattening out the upward movement evident for the previous 9 months. The seasonally adjusted estimate for September 1994 increased by 9.0% from August 1994 and 15.8% from September 1993. In original terms there were 3,619 new motor vehicles registered in September 1994, 7.0% more than August 1994 and 15.2% more than September 1993. For new passenger vehicles only, the leading makes registered in September 1994 were Holden (795 vehicles), Ford (662), Mitsubishi (550), Toyota (394) and Nissan (122).

NEW MOTOR VEHICLE REGISTRATIONS TOTAL SOUTH AUSTRALIA

Tourist Accommodation

When the June quarter 1994 is compared with the June quarter 1993, the number of holiday flats, units and houses available for short-term letting remained constant. Unit nights occupied decreased by 2.2% and consequently the unit occupancy rate fell from 36.8% to 36.1%. Accommodation takings decreased by 1.9% from \$2.4m to \$2.3m while average takings per unit night occupied remained at \$53.

Private New Capital Expenditure

Private new capital expenditure in South Australia for the June quarter 1994 was \$349 million, an increase of 2.0% over the previous quarter. New buildings and structures accounted for \$43 million while equipment, plant and machinery was \$306 million. Private new capital expenditure during 1993-94 was 10% below the 1992-93 level.

Production

Dwelling Approvals

In August 1994 the trend estimate series for dwelling units approved in South Australia turned slightly downward, following a gradual flattening over the previous months of 1994. The resultant trend value of 970 dwellings is 3.8% below the level of the corresponding month last year. Conversely the trend for the total number of dwelling units approved nationally, which has been slowing in previous months has been reversed. The trend rose by 1.6% to 16,610 in August 1994, 12.7% higher than in August 1993.

DWELLING UNITS APPROVED

Dwelling Commencements

The estimate derived from the Building Activity Survey for the number of dwelling units commenced during the June quarter 1994 was 2,873. This figure was 12.7% higher than that for the previous quarter and 5.0% lower than for the June quarter 1993. South Australian dwelling units accounted for 6.1% of the Australian total.

Value of Non-residential Building Approvals

The value of non-residential building approved in August was \$32.6 million, down slightly from the previous month's level of \$33.4 million. The August value comprised \$26.5 million from the private sector and a relatively low \$6.1 million from the public sector. There was a substantial increase of 46.3% in non-residential building approved nationally, primarily due to approvals in NSW moving from \$206.1 million in July to \$460.3 million in August (approvals classified to shops, health and entertainment etc. were the main contributing factors). As a consequence South Australia's contribution to the national level of non-residential building approvals fell to 3.8%.

Value of Total Building Activity

The total value of *building work commenced* during the June quarter 1994 was \$329.3 million, 4.4% higher than for the previous quarter but 9.3% less than the figure for the June quarter 1993.

At \$352.2 million the value of *building work done* during the June quarter 1994 was 6.2% above the March quarter figure although still 9.4% below that for the previous June quarter. By contrast the value of work done for Australia was 16.4% higher than for the March quarter 1994 and 12.8% higher than for the June quarter 1993.

VALUE OF BUILDING ACTIVITY

Value of Engineering Construction

The June quarter 1994 estimate of engineering construction work done in South Australia was \$197.3 million, an increase of 8.4% from the (revised) March quarter estimate of \$182.0 million. Most categories contributed toward increasing the total in June but in absolute terms roads, highways and subdivisions, and pipelines recorded the largest movements. Increased activity was widespread throughout Australia during this period as the national value of work done improved by 15.8%. All States and Territories recorded increases over the March quarter estimates.

VALUE OF ENGINEERING CONSTRUCTION WORK DONE

Prices

Consumer Price Index

In the June quarter 1994 the all groups Consumer Price Index (CPI) for Adelaide rose 0.7%, resulting in an annual increase of 1.9%. Nationally prices also rose 0.7% for the quarter and 1.7% on an annual basis.

In Adelaide the price of potatoes in the June quarter increased from the March quarter by 6.8% to 63c per kg. However, they were still 24.1% cheaper than the corresponding period last year. At \$1.66 per dozen the price of 55g eggs dropped 7.8% from June quarter 1993 to June quarter 1994. While the price of a 2 kg pack of sugar fell only by 3.2% from March to June this year, the June quarter price was in fact the same as it was in the June quarter of 1991. Wine prices increased by 7.0% over the past year and cigarettes and tobacco reflected an 11.7% jump. At the same time the price of leaded (super grade) automotive fuel has shown a modest increase of 0.4%; however, it is expected that this will rise more noticeably next quarter when the additional excise on leaded petrol takes effect.

House Building Materials

Adelaide prices of house building materials in August 1994 rose 0.4% compared with 0.3% nationally. The highest percentage increases for the month were in Hobart (0.7%) and Perth (0.6%). Prices rose 3.9% in Adelaide and Melbourne for the year ended August 1994, the highest recorded for all capital cities.

MATERIALS USED IN HOUSE BUILDING Change from Same Period of Previous Year

Non-house Building Materials

Prices of materials used in building other than house building increased in Adelaide by 0.4% in August 1994, the highest rise of all the capital cities. The major building materials showing the greatest increases were ready-mixed concrete (3.4%) and clay bricks (2.0%). Paint and other coatings fell 1.7% after a rise of 4.2% in July 1994.

House Prices

In 1993-94 prices of established houses in Adelaide fell 0.9% from the previous financial year, while nationally prices rose 2.9%. Adelaide was the only capital city to record a fall during this period. Prices for project homes rose 5.7 % in Adelaide in 1993-94, while nationally prices rose 2.7%. Only Darwin (6.5%) experienced a higher rise.

Labour Force and Demography

Population

The estimated resident population of South Australia increased by 2,040 persons during the March quarter 1994 to 1,468,563. The largest component was natural increase which accounted for 2,286 persons, while the net interstate migration outflow of 1,290 persons was partially offset by a net gain from overseas migration of 1,044 persons.

Interstate departures from South Australia amounted to 8,590 persons, 2,566 (29.9%) of whom moved to Queensland. Interstate arrivals were 7,300 in the March quarter, with 1,982 persons (27.2%) coming from Victoria.

Employment

The underlying trend estimate for employed persons in South Australia has been increasing over the past 6 months. The September 1994 estimate (650,000) was 13,900 more than the level of 12 months ago.

The underlying trend estimate of employed persons in Australia has been increasing since February 1993, reaching 7,984,000 in September 1994. Over the past 12 months, full-time and part-time employment have increased by 3.1% and 5.1% respectively.

Unemployment

The trend unemployment rate for South Australia has been falling since January this year and was 10.4% in September. Between August and September 1994, the trend unemployment rates for both males and females decreased by 0.1 percentage points, to 10.7% and 10.1% respectively.

In September 1994, the trend estimate of the unemployment rate for Australia decreased to 9.4%, continuing the downward movement evident since October 1993.

Overtime

The proportion of employees who worked overtime in South Australia in August 1994 was 18.5%, compared with 17.3% in August 1993.

Industrial Disputes

There were 3,500 days lost through industrial disputes in South Australia from June 1994 to July 1994. At 9.8% of the national total, South Australia had the third highest level of disputation of the States and Territories.

In the 12 month period to July 1994, 17,400 working days were lost through industrial disputation in South Australia.

Short-term Overseas Visitors Arrivals

Short-term visitor arrivals to South Australia in July 1994 rose to 5,829, an increase of 71.5% from June 1994 and 14.9% greater than July 1993.

Figures for Australia showed a rise to 275,084 (19.1%) from June to July 1994. This figure is also 12.5% larger than that for July 1993.

The State or Territory of stay of overseas visitors is determined from the intended address reported on arrival in Australian ports and airports. A short-term visit is any intended length of stay of less than 12 months.

Short-term Resident Departures

There were 12,764 short-term departures of South Australian residents in July 1994. This was 20.0% higher than in June and 16.2% above the July 1993 total.

In July 1994 short-term departures of Australian residents declined from June by 6.6% to 213,689, but this was still 3.2% higher than the 207,081 departures in July 1993.

Incomes**Average Weekly Earnings**

Average weekly ordinary time earnings of adult full-time employees in South Australia increased (from \$597.30 in February 1994) to \$599.80 in May 1994. Male full-time ordinary time earnings increased to \$622.90 in May 1994, compared with \$619.90 for the previous quarter. The comparable level for females was \$551.40 in May 1994, up from \$548.80 in the previous quarter.

Average weekly total earnings for all employees in South Australia amounted to \$504.80, down from \$512.80 in the previous quarter.

Since it is an average of earnings across all employees, changes in average weekly earnings may occur through changes in employment as well as changes in pay levels.

Award Rates of Pay

Over the 12 months to August 1994, the weekly award rates of pay index for full-time adult employees in South Australia increased by 1.2%.

The largest annual movement of the index for full-time adult male employees occurred in the construction industry, with a 3.3% increase from August 1993. For the corresponding group of females, manufacturing was the most prominent, with a 2.2% increase between August 1993 and August 1994.

Financial Markets**Housing Finance**

Total secured housing finance commitments for owner occupied dwellings increased during the month of August by \$16.8 million (5.9%) to \$301.9 million. This is well above all the monthly figures recorded during 1993 apart from December when the revised total amounted to \$306.7 million.

**SECURED HOUSING FINANCE COMMITMENTS TO INDIVIDUALS
SOUTH AUSTRALIA**

The main component, financing commitments for the purchase of established dwellings was up by \$14.8 million (8.7%) on the July 1994 figure to \$185.4 million. Financing commitments for construction of dwellings was up marginally on the previous month by \$0.5 million (1.0%) to \$52.5 million and purchase of newly erected dwellings rose by \$3.0 million (22.8%) to \$16.0 million.

Personal Finance

In August 1994, total personal finance commitments equalled \$178.1 million. This was an increase of \$21.3 million (13.6%) from July 1994.

Personal finance commitments under total fixed loan commitments increased \$6.3 million (5.4%) to \$122.9 million in August 1994. Of the main components of this category, 'used motor cars and station wagons' increased by \$4.3 million to \$40.9 million and 'new motor vehicles and station wagons' increased \$1.2 million (9.7%) to \$13.9 million.

Personal finance commitments under revolving credit commitments increased by \$15.0 million (37.4%). Fixed loan commitments increased by \$6.3 million (5.4%).

Commercial Finance

Total commercial finance commitments made by significant lenders increased in August to \$701.4 million from the total for July of \$440.2 million. Increases were recorded for both commitments under fixed loan facilities and commitments under revolving credit facilities.

In August 1994 commercial finance commitments under fixed loan facilities were up \$133.1 million (48.4%) on the July 1994 figures. The most significant increase was recorded for 'manufacturing' which recorded an increase of \$120.9 million. The 'finance, investment and insurance' industry increased by \$6.7 million and 'community services' by \$9.1 million.

Commercial finance commitments under revolving credit facilities increased significantly to \$293.6 million in August 1994 from \$165.4 million in July. The biggest increases were in 'manufacturing' (up \$114.7 million) and 'retail trade' (up \$40.4 million).

Lease Finance

The value of goods under new finance lease commitments totalled \$25.6 million in August 1994. This was a decrease of \$0.9 million (3.4%) on the July 1994 figure of \$26.5 million. This is up by \$5.2 million (25.8%) on August 1993.

The category of 'total motor vehicles' decreased by \$1.5 million (7.4%) to \$18.2 million in August 1994. Finance lease commitments for 'electronic data processing equipment' rose to \$2.3 million and the other major increase was for 'new heavy trucks' up \$3.8 million.

FOCUS

Working Arrangements of South Australian Employees

Introduction

The first Australian Bureau of Statistics (ABS) survey of Working Arrangements was conducted in August 1993. This survey collected information on the working arrangements of Australia's 6.3 million employees aged 15 and over, including details of their use of flex-time, rostered days off, shift work, overtime, accumulation of extra work hours for later time off, variations in the make-up of the working week and also the use of formal childcare.

The information in this article concentrates on the working arrangements of South Australia's 509,600 employees.

Flexibility of Start and Finish Times

Two-thirds (332,400) of South Australia's employees started and finished work at fixed times; 69,100 of these had negotiated these times with their employer. Of the remaining 177,200 employees whose start and finish times were not fixed, 112,300 (22% of all employees) were able to vary these times on a daily basis.

Some 24% of male employees had this degree of flexibility, compared with 19% of female employees. Managers and administrators (55% of males and 53% of females), professionals (40% of males and 23% of females) and clerks (36% of males and 28% of females) were the most likely to be able to vary their start and finish times daily.

SELECTED OCCUPATIONS: PROPORTION WITH FLEXIBLE START AND FINISH TIMES, (VARIABLE DAILY), SOUTH AUSTRALIA

Employees with children under twelve years of age were more likely to have access to this level of flexibility in start and finish times (27% of males and 22% of females) than those without children under twelve years of age (23% of males and 18% of females).

Rostered Days Off (RDOs)

Rostered days off are designed to extend the operational hours of a business without increasing total hours worked by employees above standard hours. RDOs were available to 28% of employees in their main job. Males were more likely to be entitled to RDOs (36%) than females (18%).

The proportion was higher for full-time employees (36%) than for part-time employees (4%). The occupations with

the highest proportions entitled to RDOs were para-professionals (56% of males and 42% of females), tradespersons (48% of males and 32% of females), clerks (36% of males and 20% of females), plant and machine operators, and drivers (47% of males and 32% of females), and labourers and related workers (43% of males and 14% of females).

Among persons entitled to an RDO, 64% had a choice of which day was to be taken off. This proportion was higher for females (76%) than for males (59%).

Overtime

Overtime was worked on a regular basis by 165,800 employees, or 32% of total employees. Males accounted for two-thirds of the number working overtime, with 39% of all male employees regularly working overtime, compared with 25% of female employees.

Some 41% of full-time permanent employees worked overtime on a regular basis (44% of males and 37% of females) while a fairly high proportion of full-time casual employees also worked overtime regularly (36% of males and 21% of females). Only 11% of part-time employees worked overtime regularly.

Of those employees who worked overtime on a regular basis, 38% had been paid for their most recent period of overtime.

PROPORTION OF EMPLOYEES REGULARLY WORKING PAID OR UNPAID OVERTIME, SOUTH AUSTRALIA

Tradespersons, plant and machine operators, and drivers, and labourers and related workers were the most likely to have been paid for their most recent period of overtime (77%, 87% and 85% respectively), while managers and administrators, and professionals were the least likely to have been paid for their most recent period of overtime (both 8%).

Shift Work

In the four weeks before the survey, 13% of South Australian employees (68,000) had worked shift work. The numbers of male and female shiftworkers were approximately equal.

Male shiftworkers were mostly permanent full-time employees (86%), while the distribution was different for female shiftworkers, with 41% permanent full-time

employees, 26% permanent part-time employees and 29% casual part-time employees.

SHIFT WORKERS BY TYPE OF SHIFT: SOUTH AUSTRALIA, AUGUST 1993

For both male and female shiftworkers, the most common type of shift worked was the rotating shift, worked by 44% of shiftworkers. More males worked this type of shift than females (17,900 compared with 12,300).

The next most common types of shifts worked were irregular shifts (16%), regular evening night or 'graveyard' shifts (15%), and regular afternoon shifts (10%).

The highest representations of shiftworkers were in the occupations para-professionals (27%) and labourers and related workers (19%) and in the industry group community services (47%).

Time Credits

More than one-third of both male and female employees (176,800 in total) were able to work extra hours in order to take time off at a future date, that is, they were able to accumulate time credits.

The proportion of full-time employees, whether permanent or casual, who could accumulate time credits was 38%, compared with 25% of part-time employees.

Managers and administrators and clerks had greater opportunity to accumulate time credits (50% and 55% respectively) than other employees. Male professionals and para-professionals also had high proportions able to accumulate time credits (both 36%), although females in these occupations had lower levels of entitlement (both 26%).

Absences from Work

An estimated 88,000 employees (17%) had an absence from their main job of at least three hours duration in the two weeks before the survey.

A greater proportion of full-time employees had an absence (19%) than part-time employees (12%). For full-time employees, the rate of absence was similar for permanent employees (19%) and casual employees (18%). However, part-time permanent employees had a higher rate of absence (16%) than casual employees (10%).

The most common types of leave used for the most recent absence were sick leave (54%) and holiday leave (23%). The most common reasons given for the most recent absence were 'own ill health, disability or pregnancy'

(52%) and 'recreational purposes' (19%). Most persons (75%) were on paid leave for their most recent absence.

Weekly Work Patterns

About 78% (290,000) of full-time employees in South Australia usually worked Monday to Friday in their main job. A further 12% (46,400) usually worked weekends as well as week days while most of the remainder worked varying days each week.

PARTICIPATION IN SELECTED WORKING ARRANGEMENTS, SOUTH AUSTRALIAN EMPLOYEES, AUGUST 1993

Part-time employees had a variety of work patterns in their main job: 24% worked on each of the days Monday to Friday; 30% usually worked three days only; 23% varied their days each week; 19% worked a combination of week days and weekends; while 5% worked only on weekends.

Use of Formal Childcare

Formal childcare comprises any arrangement made for the care of children under 12 years of age at a pre-school, childcare centre, family day care centre or full day care centre, in the workplace or out of normal school hours.

The Working Arrangements survey found that formal childcare was used by 34% of South Australian employees with children aged under 12 years. Other findings included:

- part-time employees were more likely to use formal childcare than full-time employees; the proportions were 37% and 32% respectively;
- 35% of working parents with fixed start and finish times used formal childcare, compared to 31.4% of working parents with variable daily start and finish times;
- 34% of working parents without RDO entitlements used formal childcare, compared with 32% who had RDO access;
- public sector employees were more likely to use formal childcare than those in the private sector; the proportions were 39% and 31% respectively.

Further Reference

Further information on this survey is available in the ABS publication, *Working Arrangements, Australia: August 1993* (6342.0) which may be obtained from ABS Bookshops in all capital cities. Inquiries in South Australia should be directed to Arnold Strals on (08) 237 7332.

(a) From September quarter 1992, caravan parks sites etc permanently reserved but only casually occupied by their tenants have been recorded continuously as site nights occupied irrespective of whether the tenants of individual sites were in residence on any particular night. Therefore occupancy measures from that quarter are not comparable with those from previous quarters.

ABS PUBLICATIONS AND PRODUCTS

Statistics collected by the ABS are generally made available to clients in published form. Some, including those not published, are available in one or more of the following forms: microfiche, magnetic tape, computer printout, CD, floppy disk, photocopy and clerically extracted tabulation.

Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues on Tuesdays and Fridays a *Publications Advice* (1105.0) which lists publications to be released within the next few days. The *Catalogue* and *Publications Advice* are available from any ABS Office.

To receive ABS publications on a regular basis contact the *ABS Publication Mailing Service* on (008) 02 0608.

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS Office.

The *ABS Information Consultancy Service* has specialist staff to assist and advise clients with their statistical inquiries. For more detailed information about

these services call at the ABS, 55 Currie Street, Adelaide, telephone the Information Officer on (08) 237 7100, or write to Information Service, ABS, GPO Box 2272, Adelaide 5001.

The ABS also provides a *Statistical Consultancy Service*, for expert assistance in survey, sample and questionnaire design, data collection, processing and analysis, and statistical modelling. For more information contact Gary Niedorfer, telephone (08) 237 7379.
